MTX65 TERMINAL

Intelligent

The MTX63-MTX65 terminal is an intelligent GSM/GPRS terminal that encapsulates everything you need in one compact plug-and-play unit. Together with its small size and all the standardized connector interfaces, with its own SIM card reader minimise the need for further hardware components and makes it easy to integrate.

MTX65 is same as MTX-63 module, but include Java embedded programability and full range of I/Os

Powerful

The MTX65 compact self-contained unit can host and control your Java J2ME application in conjunction SDK package, allowing to develop and embed your code directly onto the MTX65, shortening time to market and reducing costs.

The Quad Band functionality allows operation in all relevant GSM frequencies.

Flexible

The USB and RS232 ports allow connectivity to PC's, control boards and other peripherals like GPS, Bluetooth, RFID or other devices.

Simple

The MTX63/5 terminal is an all-in-one solution enabling voice, SMS, fax and data, and GPRS with its powerful TCP-IP stack communication with Internet Services: TCP, UDP, HTTP, FTP, SMTP, POP3

MTX63/5 is manufactured with SMD Technologies with the ISO 9001 & ISO 14001 Quality certifications

A full list of antennas, cables and supplies accessories are available.
